

2008 Data Protection Summit

Secure Storage, Trusted Devices, Confident Customers

*at the only conference
dedicated to data protection!*

Conference Highlights

All-Day Forums: Drive Encryption (sponsored by Trusted Computing Group); Windows Security; Virtualization Security

Tutorials: Developing a Data Protection Plan for Your Organization, Email Security, Mobile Security

Special Sessions: Issues Roundtable on Preventing Data Breaches; Beer, Pizza, and Chat with the Experts, featuring expert tables on a wide variety of subjects.

The Users Talk Back with major end users explaining what security issues they face and what products they want.

Venture Capital in the Computer Security Industry featuring leading VCs and a 1-page business plan contest.

Security Star Competition, with security leaders describing their views on the top security threat of 2008 and how to combat it (and the audience picks the winner).

“Cybercrime is a big business. Some estimate it’s a billion dollar industry with botnets, phishing scams, adware and spyware attacks.”

— Greg Garcia, US Dept of Homeland Security
